

Validation app

- Easy provision of discounts and subscriptions
- Overview and control over given validations
- Unlimited number of app users
- Loyalty tool for local businesses
- An app for Android and iOS

User Friendly

The ParkBase Validation app is available for both Android and iOS. Validation options are set by the administrator in the ParkBase PMS for each affiliated company or department. After this the app can be linked via a QR-code with an username and password. The number of app users per affiliated company or department is unlimited.

Efficient Recoding

There are several options for efficiently requesting a current parking transaction from the parking management system:

- Scan the bar/QR-code of a parking ticket with a mobile device
- Enter a parking ticket number manually
- Enter a license plate

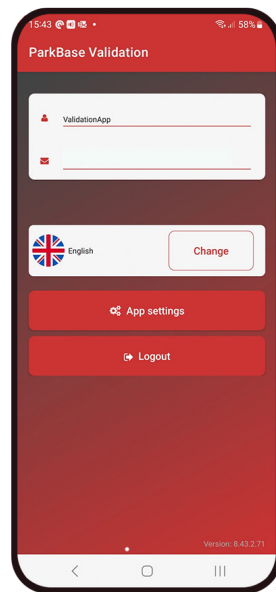

Options

Depending on the options released, the app allows different choices be made, such as:

- Convert to a different rate
- Recode parker to subscription holder
- Convert parker to visitor
- Discount in percentage
- Fixed amount discount
- Discount in time

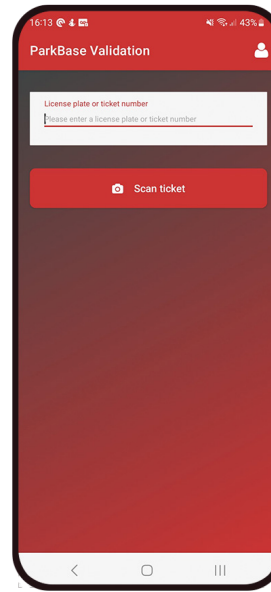

Win Win Situation

Through the ParkBase Validation app, the administrative burden and distribution of physical tickets is eliminated. This sets up the ideal environment to create loyalty systems with local companies, such as shopping centers, restaurants, cinemas and theaters. For example, if you manage a facility close to a shopping center, retailers can offer their customers discounted parking at their expense with validation through the ParkBase Validation app.

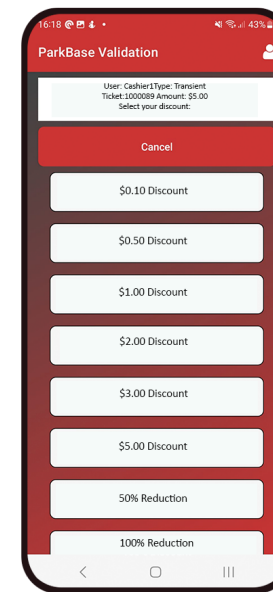

Step 1

Log in

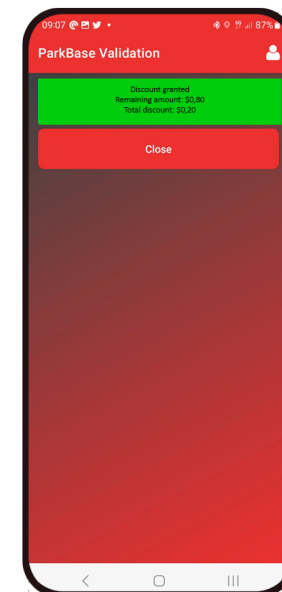

Step 2

Scan your parking ticket, enter your ticket number or license plate

Step 3

Make your choice

Step 4

Confirmation of processing in ParkBase
