.NET Backend Engineer

Evora, Portugal 

40 hours 

70% Software Development: Design, develop, test and implement server-side logic and databases for the Stadsparkeren application

30% Projects meetings such as daily standup, sprint review, sprint planning and retrospectives

You work with frontend developers, product managers and other stakeholders to understand technical requirements and ensure seamless integration between frontend and backend **1.**

You ensure high code quality, including code reviews, unit tests and adherence to best practices for software development **2.**

The programming languages and tools we use for code writing: **3.**

- C# and SQL
- Rider/Visual Studio

You work with scalable and real-time applications **4.**

WE ARE LOOKING FOR

- Someone who is eager to learn
- An expert in developing backend for large scale systems
- Strong problem solving skills and the ability to tackle complex challenges.
- A team player and a mentor
- Someone who help the company grow and who will grow with the company.

REQUIREMENTS

- A degree in computer science, computer science or a related field
- Extensive experience with programming languages such C#, Java or similar.
- Frameworks and tools: .NET Core and .NET Framework
- Experience with both relational databases (i.e. SQL Server) and NoSQL databases (e.g. MongoDB, Redis).
- Understanding of different architecture patterns such as microservices, serverless and monolithic architectures.
- Basic knowledge of system administration and server configuration in cloud environments such as AWS, Azure or Google Cloud Platform.

WE ARE OFFERING YOU

- Competitive salary

GET TO KNOW THE TEAM:

As member of our ever growing and dynamic team you will be working on:

- Server logic: Handling data processing, business logic and server-side functionality.
- Database management: Manage database schema, optimize queries and ensure data consistency, security and scalability.
- Performance and scalability: Fine-tune server performance, implement caching strategies and design for horizontal scalability to handle increased user loads.

Team goals:

- Reliability: We want to build a product that is synonymous with trust
- Scalability: We want to build a product used by millions
- Security: Bring peace of mind to our clients

Family business

IP Parking is a young and dynamic company full of experience. In our family business, hard work is combined with the necessary dose of fun. We are more than just colleagues and our mutual contact is friendly and based on trust.

Development

Development is important to us, not only in our products, but also for our employees.

We facilitate (internal) training programs, like to think along with you about possibilities and offer the space to grow.

Technology

We develop our products ourselves, both the software and the hardware. Here we combine different and interesting techniques. Our mission is to offer our customers and their end users the best Xperience. This ensures that we are constantly looking for new opportunities, techniques and developments. We believe it is important that all employees are given the space to think along in the process and to contribute to the continuous innovations of our services and product range.

We don't have to be the biggest, but we do want to offer the best service to our customers.

International

Despite the small and close-knit teams, we are part of a growing international organization. We believe it is important that we also work closely with our own customer centers in North America and Belgium and our dealers worldwide, even remotely.

A large company that therefore feels small and where people really make the effort to get to know each other better.
