# Xperience Seamless Parking & Charging

**50% of all cars sold worldwide expected to be electric in 2035!**

Parking facilities play a crucial role in meeting this rapidly evolving demand for EV-charging solutions, and thereby advancing the global sustainability efforts.

IP Charging empowers operators to offer Parking & Charging in 1 transaction, enhancing efficiency and customer experience. Utilizing IP Parking's ParkBase PMS unlocks innovative service offerings, catering to diverse parking profiles.

Our high-quality Ostra charging solutions provide reliable EV-integrations, setting operators up for optimized revenue and improved service.

## Minimum Effort

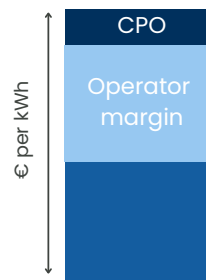

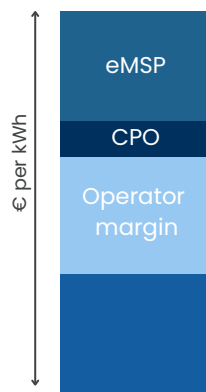

- > Hassle-free, end-to-end smart charging solutions
- > Cost-efficient operation enhancing revenue streams
- > Low TCO and easy expansion

## Maximum Control

- > ParkBase (PMS) integrated
- > Differential pricing per parking profile
- > Smart charging / Dynamic load-balancing
- > Smart charging profiles
- > Data driven dashboards

### Market standard

*eMSP in charge of pricing, no control for operators*

## Take Control!

### With IP Charging

- Direct payment, independent of eMSP's
- Dynamic Pricing
- Seamless PMS integration
- Operator in full control

## Hot Swap

With the **Perla** interchangeable smart core, our charge points offer flexibility and efficiency while the sturdy housing ensures long-term durability. Experience powerful performance and effortless maintenance. Operators can easily replace the smart core themselves, limiting downtime to **3 minutes!**
